

SEAB, (European Society of Applied Biomedicine), registered offices at 30, Via Ronchi 20132 Milan Italy, was established on the 9th. July 1992 to persue the activity of SIAB (Italian Society of Applied Biomedicine) established in 1985.

SEAB, since its establishment, has always collaborated with Italian and foreign institutes to promote updating courses and training sessions on high- standard scientific issues for graduates in Medicine and Surgery and similar disciplines (biology, pharmacy, psicologia).

SEAB has been thoroughly involved in the organization of scientific conventions and cultural exhibitions of both a National and International standing.

The most outstanding feature of all the proposed scientific initiatives has always been the prominence of the speakers (university professors along with scholars of the programmed subjects) and the huge number of enrolled participants.

SEAB, for the academic years 1993 until today, has also been organizing post-graduate courses at the Bioclimatology, Medicine and Biotechnology Research Centre at the Università degli Studi di Milano; Natural Medicine.

SEAB has also personally held quite a number of short scientific courses divided into lessons on theory and followed by lessons on practical skills enhancement.

Enrolling at SEAB means:

- Getting to know all the programmed scientific initiatives for the academic year of enrollment.
- Taking part in the programmed initiatives at a discounted price or totally free of charge.
