ELECTROMEDICAL EQUIPMENT – NATURAL PRODUCTS

VIA RONCHI, 30 – 20134 – MILAN (I) - tel. +39 02 21597558 - fax +39 02 21597559 - E. MAIL: zener@zener-seab.it

WHO WE ARE

Zener, medical equipment and apparatus manufacturer, has designed, produced and marketed equipment and apparatus Made In Italy for over 25 years. The breakthrough has been the success of those techniques commonly used on a regular basis together with recognition at both a national and international scale.

All equipment complies with required safety standards and comes with scientific, medical and clinical certification.

Zener has always given top priority to scientific research and a conspicuous amount of its annual turnover goes to investments in private and state research centres to:

- Design and turn out innovative, high-tech products.
- Organize training courses and conventions to upgrade the skills of end-users.

Since the beginning of the 90s, Zener has extended its production line to manufacture and sell natural products and innovative cosmetics.

In 1994, it created eccimeri products which increase the bioavailability of the Organism to enhance the absorption of active principles thus providing an important biological response even on low doses.

The plants used to create Zener's natural products hold a phytomedical certificate, a cyto certificate and have furthermore undergone botanical inspections and phytopathological tests by both Italian and E.U. controlling bodies. Other non-vegetable components (clays, excipients etc.) are duly certified.

Zener products are officially registered in the Italian pharmaceutical handbook and are available at all chemist's.

Registered offices.
