# Linea Oxy Cream

## *ELECTROMAGNETIC COSMETICS*

The preparation of cosmetics entails the utmost attention when it comes to choosing those active principles to be used, seeing as this identifies (along with the preparation techniques) exactly where the cosmetic will be placed.

Generally speaking, in cosmetology only the chemical active principals, have ever been taken into any kind of consideration and only lately have the “physical active principles” been both studied and applied.

The results of this multidisiplinary research lie in the birth of the so-called electromagnetic cosmetics which require particular preparation techniques in an environment equipped with strictly controlled physical parameters (depressurization, temperature, lighting, a particularly strong and modulated magnetic and electric field) An interesting example of this latest generation of products can be seen in those creams, containing ozonized olein, in which the choice of the chemical active principles (useful in any case) is conditioned by their interaction with the ozone already present under the form of rising oxygen.

Ozonized olein is a really efficient “natural carrier”

Oxy cream line really does regenerate the skin, be it face, eye contours or body, in a natural, long-lasting and most effective way.

## Oxy Face Cream

### *PRINCIPLE FACTORS*

- Natural ozonized oleic acid
- Vitamin C
- Vitamin E
- Silk Protein
- Ceramide
- Saccharomycetic Ceratum Extracts

## **Oxy Body Cream**

<i><b>PRINCIPLE FACTORS</b></i>
<ul style="list-style-type: none"><li>• Natural ozonized oleic acid</li><li>• Oxide reductase</li><li>• Soya Peptides</li><li>• Vitamin A</li><li>• Vitamin C</li><li>• Vitamin E</li><li>• Phytic acid</li></ul>

## **Oxy Eye Contour Cream**

<i><b>PRINCIPLE FACTORS</b></i>
<ul style="list-style-type: none"><li>• Natural ozonized oleic acid</li><li>• Oxide reductase</li><li>• Soya Peptides</li><li>• Vitamin A</li><li>• Vitamin C</li><li>• Vitamin E</li><li>• Phytic acid</li><li>• Natural Alfa Bisabolene</li></ul>
